

High quantity in High precision

SHAPE YOUR PROFILE

High quantity in High precision

OUR MISSION

MIMplus Technologies is a specialist in manufacturing small metal parts for different industries. We produce precision parts for spectacles, gears, mobile phones or automobiles. In our division "profileplus" pre-shaped metal profiles out of different materials are processed by reaching the accurate final required shape. This is done in a high speed automated production exclusively in own designed and constructed machines. Further surface treatments i.e. galvanic, tumbling or sand blasting can be done on request.

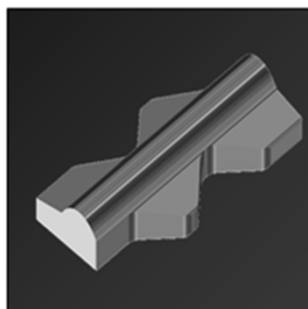

OUR OFFER

- High speed metal cutting up to 80 pieces per minute
- High precision components with an accuracy of $\pm 0,02\text{mm}$
- Annual volumes up to multi-digit million units
- Current profile sizes: 85mm length x 18mm width x 7mm height
- Materials: titanium, nickel silver, bronze, various stainless steel
- More than 250 different profiles in production
- Permanent measurement & surface control
